ABOUT

In my current role as a geospatial analyst, I take pride in my craft and am constantly honing my technical skills. Beyond the screen, I have skills in the field from landscaping labor to data-driven analyses in the field. I am an environmentalist and am always looking for opportunities to contribute to my community's well-being. I round out my practice with creative outputs in the realms of art and music.

SKILLS

Geospatial Analyses,
ESRI/ArcGIS, ArcPy,
Wingtra Suite, Propeller,
Pix4D Suite, Layouts -
Map Graphic Design,
Drone Surveys,
Database Management,
Spatial Analyses,
ESRI License Coordination
and Administration

EXPERIENCE

GIS Analyst

2023 - current

My first task with Garcia was to stand up their GIS infrastructure and gather all spatial data on properties managed by Garcia Professional Services (formerly Garcia Environmental Services). My duties include but are not limited to: database management, licensing & administration, land management, data collection, field work - construction and early civil, imagery processing and analysis, stockpile analysis, data QA/QC, training, and hosted feature management and interoperability.

Native Gardening / Landscaping

2021 - 2023

In Wilmington, Delaware I was offered the opportunity to provide aesthetically pleasing and ecologically viable gardens to residential areas. I am well-versed in northeastern native plants, mycology, stonework, demolition, and sustainable horticultural practices.
